

TELMAH KINYUY TANTOH

SOFTWARE DEVELOPER / ENGINEER | BACKEND, FULL STACK & CLOUD

Toronto, ON | 226-343-5722 | tantohtelmah@gmail.com

[LinkedIn](#) | [GitHub](#) | [Portfolio](#)

PROFESSIONAL SUMMARY

Computer Science graduate with experience developing Python automation, cloud data integrations and production frontend features. Builds full-stack applications with React, Flask and PostgreSQL and backend services with Java and Spring Boot. Combines Azure workflow development and AWS deployment with testing, debugging, clear documentation and Git-based team collaboration. Projects span banking services, career management and AI-assisted business workflows.

TECHNICAL SKILLS

Languages: Python, Java, JavaScript, TypeScript, SQL, C, HTML, CSS

Backend & APIs: Spring Boot, Spring Security, Spring Data JPA, Hibernate, Flask, FastAPI, REST APIs, JWT, SQLAlchemy, Alembic

Frontend: React, Angular, Ionic, responsive interfaces, API integration

Data & cloud: PostgreSQL, MySQL, Snowflake, ETL; Azure Functions, API Management, Blob Storage; AWS S3, CloudFront, Elastic Beanstalk, EC2, RDS

Testing & delivery: JUnit 5, Mockito, Spring Boot Test, MockMvc, Postman, Git, GitHub Actions, CI/CD, Docker, Linux/WSL, Bash, debugging, logging, Agile/Scrum

Engineering & AI: Object-oriented design, data structures, design patterns, technical documentation, OpenAI API, document processing, human-in-the-loop workflows

PROFESSIONAL EXPERIENCE

First Capital REIT | Data & Automation Intern | Toronto, ON | 2026

- Developed Python applications and automation workflows that translated business requirements into repeatable data-processing services.
- Built nightly ETL integrations to retrieve enterprise data through Azure API Management, process datasets, stage outputs in Blob Storage and support Snowflake loading.
- Developed and deployed Azure Functions workflows to support serverless execution of scheduled business processes.
- Wrote SQL queries, validated data across source and destination systems and investigated failed or incomplete records and integration issues.
- Collaborated with business and engineering stakeholders on requirements and fixes; documented architecture, configuration, operating procedures and troubleshooting.

TradeBinder | Frontend Developer | Remote | Dec 2025 - May 2026

- Developed responsive Angular, Ionic and TypeScript features for a production web/mobile application using HTML and CSS.
- Integrated REST APIs to connect frontend interfaces with backend services and support dynamic user workflows.
- Worked with engineers through Git and Agile practices to implement features, troubleshoot defects and improve user experience.

EDUCATION

Bachelor of Science in Computer Science | University of Guelph | Jun 2026

Cumulative GPA: 3.3/4.0 | Coursework: Software Design, Databases, Operating Systems, Computer Organization, Computer Networks, Data Structures and Algorithms, Cryptography

Software Engineering Program | ALX Academy | Aug 2023 - Nov 2024

Computer Engineering Studies | University of Bamenda | Oct 2020 - Jan 2023

SELECTED SOFTWARE PROJECTS

CareerMap | React, Python, Flask, PostgreSQL, AWS

- Built a full-stack career platform with React interfaces and authenticated Flask REST APIs for job tracking, recommendations and personalized career roadmaps.
- Implemented PostgreSQL-backed data models with SQLAlchemy, Alembic migrations and JWT authentication.
- Deployed the frontend through S3 and CloudFront and the API through Elastic Beanstalk, using Route 53 DNS and ACM TLS.
- Diagnosed environment configuration, database connection and CORS issues across frontend, backend and cloud deployments.

North Banking | Java, Spring Boot, Spring Security, PostgreSQL, Docker, AWS

- Developed REST APIs and backend services for customer onboarding, account management, funds transfers, payments and transaction history.
- Implemented JWT authentication and role-based access control to restrict access to customer and financial data.
- Added input validation, global exception handling, structured logging, pagination and filtering to support reliable application behavior.
- Documented APIs with OpenAPI and implemented automated tests to support maintainability and verification of backend services.

TenderOps AI | Python, FastAPI, React, PostgreSQL, OpenAI API

- Developed an AI-assisted workflow platform for tendering, document analysis, approval routing, quotation generation and contract drafting.
- Built backend APIs and data models for document intake, structured extraction, compliance checks and business review workflows.
- Integrated OpenAI-powered features with human-in-the-loop review to retain user oversight of consequential decisions.

ADDITIONAL TECHNICAL EXPERIENCE

UNITA Contractors | IT Network & Data Intern | Bamenda, Cameroon | Jan - May 2023

- Supported network and workstation troubleshooting, data organization and technical documentation; recorded repeatable resolutions for operational issues.

ITNet Solutions | Java Developer Intern | Bamenda, Cameroon | Aug - Oct 2022

- Developed and tested Java components using object-oriented design, collections and exception handling; debugged defects and participated in code reviews and Git-based team workflows.

MILITARY & CUSTOMER EXPERIENCE

Canadian Armed Forces Primary Reserve | Gunner | Ontario | Jan 2025 - Present

- Completed Basic Military Qualification and Sentinel training; apply accountability, structured communication and disciplined teamwork in time-sensitive environments.

TELUS | Sales Representative | Ontario | 2026 - Present

Translate customer needs into practical technology and service recommendations.

Reliance Home Comfort | Customer Service / Technical Support | Aug 2023 - Sep 2024

Resolved account, billing and technical concerns; documented interactions and explained next steps clearly in a high-volume customer service environment.
